Syntax Soft-Tech to Distribute Internet content Filtering Software

Thursday 25th January 2007

Syntax Soft-Tech India Private Limited has signed a distribution agreement with ContentKeeper Technologies, a vendor of Internet content filtering software applications, the distributor said in a release. ContentKeeper Technologies allows organizations to monitor, manage, control & secure staff access to Internet resources. ContentKeeper will operate in India with Syntax as its distributor for its solutions.

The software allows organizations to monitor, manage and control staff access to the Internet; Allows organizations to develop and enforce their own Internet acceptable use policies; Controls access in ways including site, site categories, file types, media type, users, groups, network addresses, and time of day.

It has both a built-in real-time engine to catch new sites as well as the industry's most up-to-date site control list (with hourly updates); It can be delivered as installable software or as an appliance, along with its associated hourly update service; and it is designed to fit easily and transparently into large or small networked computing environments, the release said.

About ContentKeeper Web

ContentKeeper Web provides revolutionary technology that allows it's users to Monitor, Manage, Control and Secure access to the Internet and enforce the Acceptable Usage policies developed by the user themselves.

Closed Loop Collaborative Filtering™ is ContentKeeper Technologies exclusive closed circuit system designed to collect, analyse, categorise, edit and distribute web site URL's worldwide. It is this unique technology that provides the basis for our award winning product. With additional features such as the ease of implementation, ease of use, with simple point and click policy maintenance and multiple report format options ContentKeeper Web will maintain our position as a leader in innovation in the Internet security industry.

ContentKeeper is supplied as an appliance device, and is designed to fit easily and transparently into all network environments, including ISPs. The design of ContentKeeper's standalone system removes filtering load from the proxy server or firewall, increasing speed, reliability and security, and eliminating latency from the network. ContentKeeper Web is completely scalable and has the flexibility to suit all systems, in large and small organisations in all sectors.

ContentKeeper Technologies has a range of Internet security products available in addition to ContentKeeper Web. Please visit our website for more information www.contentkeeper.com.
