

WEB SECURITY GATEWAY SOLUTION CK-WSG

MONITOR • MANAGE • CONTROL • SECURE • MONITOR • MANAGE

FEATURES

The CK-WSG appliance is a modular system combining up to 16 Web security engines, including:

URL filtering with ContentKeeper's award-winning, enterprise-strength Web filtering system, ContentKeeper Web.

Anti-Virus (cache-based and streaming) to combat known and zero-day threats, phishing activity and botnets, and other malicious code.

Caching with the ContentKeeper Cache Server.

SSL Security, with a choice of non-decrypting Certificate-based filtering and/or ContentKeeper's SSL inspector (SSLi) deep packet inspection module that decrypts, inspects and re-encrypts.

Comprehensive reporting on Internet activity with ContentKeeper Advanced Reporting Module (ARM). Allows fully customizable, on-demand and automated reporting.

Real-time alerts for Internet activity with ContentKeeper Monitor.

The CK-WSG solution is a modular system combining up to 16 web security engines:

- Combine up to 8 modules of your choice on one appliance.
- Easily add new modules to your existing solution as required.

Complete Enterprise Secure Web Gateway Solution

Introducing ContentKeeper Web Security Gateway (CK-WSG)

The ultimate secure Web gateway solution for large enterprises, combining multiple critical secure Web gateway functions on a powerful compartmentalized appliance.

Benefits:

Integrated functionality.

Several critical security functions are combined in a single appliance, greatly reducing administrative overhead and effort in securing the Web gateway and reducing Total Cost of Ownership.

Powerful scalability.

Designed to secure the most demanding enterprise environments, with large volumes of data and many Internet users.

High Availability and fault tolerance.

These are built in to the solution, with Load-Balancing* and additional modules easily added.

Single management interface.

Manage all aspects of your Web gateway security functions from a single, easy-to-use management interface.
