

CK Mobile for iOS

Web Filtering, Real-time Visibility and Granular Controls

KEY FEATURES:

- Comprehensive Filtering
- Accurate User Identification
- Granular Policy Management
- Domain and Sub-domain Controls
- Web Reporting and Analytics
- Suspicious Behavior Analysis

MAIN BENEFITS:

- Consistent User Experience
- Centralized Management
- Real-time Visibility and Control
- Enable Safe Remote Learning
- Policy Compliance
- Superior Customer Support

Remote Learning Policy-Based Management and Controls

ContentKeeper's CK Mobile for iOS provides an easy-to-manage, more secure way for schools to enable virtual learning on school-issued iPad devices. By providing centralized management, consistent filtering and comprehensive reporting and analytics, ContentKeeper ensures schools are policy compliant and maintain a safe learning environment when deploying iPads for 1:1 programs. iPad devices can be fully secured and safely used as remote learning tools.

Tamper-Proof and Seamless 1:1 Policy Management

- Prevents filtering settings from being disabled or removed by even the most tech-savvy students.
- Seamless user authentication ensures age-appropriate policy management and accurate reporting.

Intelligent SSL Inspection

- Provides the level of visibility and granular controls required to keep students safe and analyze if content is appropriate for learning.
- Granular domain and subdomain controls allow safe access to popular domains including YouTube, Vimeo and Google.

Robust Safety and Security

- Identifies and blocks access to suspicious apps and protocols students use to circumvent web filters and anonymously access the Dark Web.
- Provides real-time visibility, in-depth analytics and intelligent dashboards to help improve security and safeguard students.
- Real-time monitoring, contextual analysis and alerting of suspicious online activity help prevent potential self-harm and bullying.

Ease of Deployment and Support

- Seamlessly supports 1:1 programs, requiring minimal ongoing administration effort or costly disruption to a district's or school's existing IT infrastructure.
- Integrates with leading MDM solutions including Jamf and FileWave to simplify deployment process.
- Flexible deployment options including cloud, hybrid, and on-prem provide scalability on demand.
- Superior service and support with expert deployment ensures proper installation and training.
