

Load Balancing Appliance

Intelligent Transparent Load Balancing for High-Capacity Networks Approaching 100Gbps

KEY FEATURES:

High-Capacity Layer 2 Transparent Load Balancing

Supports loads up to 100Gbps

Traffic Management

Processes only traffic you are interested in with CK-LBA's traffic filtering rules

Easy Installation and minimal administrative overhead

Full Integration with ContentKeeper gateway appliances providing more intelligent and robust balancing

Scalability

Configurations available for 1G to 100G networking environments

Web-Based Administration

Provides a secure, intuitive web-based graphical interface; compatible with all major web browsers

Multi-Gigabit Load Balancing & Packet Brokering

ContentKeeper Load Balancing Appliance (CK-LBA) provides intelligent, Layer 2, multi-gig load balancing for demanding high capacity, high availability networks.

The system is fully integrated with our gateway appliances, providing high performance and high availability for on-premises or hybrid cloud deployments.

CK Load Balancing Appliance Advantages

- 10Gbps, 40Gbps and 100Gbps high-capacity throughput
- Single or dual primary links
- TCP & UDP port-based packet brokering capabilities
- Intelligent rules-based traffic management
- Multiple balancing algorithms
- Full mobile device management interface support (iOS, Android, Mac, Windows and Chromebooks)
- Configurable high availability with switch-to-wire or air-gap state settings
- Appliance based or virtual machine deployment
